DARTS

Products Code. SWFA-00200001

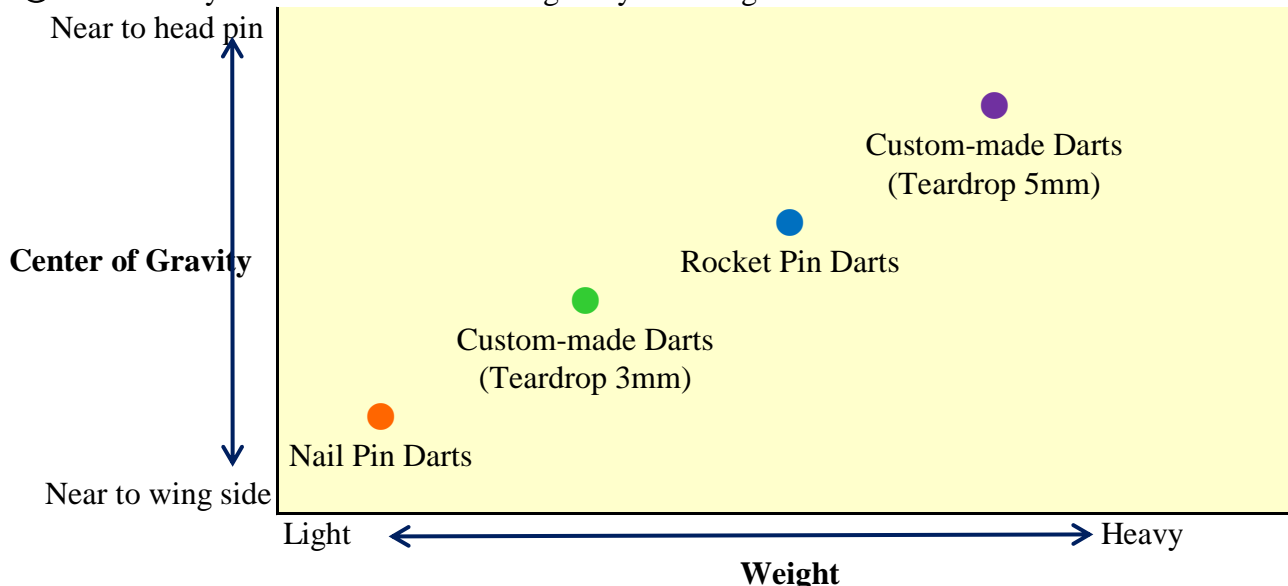

In addition to the currently offering "Rocket Pin Darts", two types of new darts were introduced in February 2021.

These are "Custom-made Darts" and "Nail Pin Darts".

You can select the most suitable darts for you considering each characteristics (center of gravity, weight) and their diameter.

Here is the chart of characteristic of each dart for your selection.

© To select by the location of center of gravity and weight

In case of a player who has stronger abdominal breathing, there is a tendency that the focusing property becomes higher by using the dart whose center of gravity is near to head pin.

In case of a player who has rather weaker abdominal breathing, lighter darts whose center of gravity near to wing side may be easier to blow.

* These are based on our investigation and higher scores can not be guaranteed.

* Custom-made Dart is compared with other darts as a set of Head-part and Wing-part.

© To select by the diameter of dart

Cut type darts can be used as it is. Diameter of dart is approximately 12.90mm.

L type dart shall be adjusted its diameter by each player based on the strength of abdominal breathing.

(Availability)	Custom-made	Rocket Pin	Nail Pin
Cut type	No	Yes	Yes
L type	Yes	Yes	No

DARTS Products Code. SWFA-00200001

© What are "Custom-made Darts"?

- Although head pin is still usable, film (wing part) may not be used because of being crumpled. What a waste!
- When two or more darts overlapped, film part of darts may be damaged. It reduces the joy of hitting the center of target.
- Want to select a dart which has the most suitable weight.

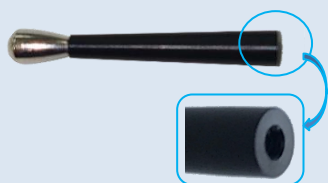

"Custom-made Darts" must be the darts to answer these requests!

Custom-made Darts

Head part and wing part are detachable. You can combine head part and wing part freely to create your favourable darts.

Point 1: Two different weigh of Head parts are prepared.
You can select the most suitable head part based on your strength of abdominal breathing.

Head part

Thereaded screw hole at the end of head part

Wing part

Screw at the joinning segment

Point 2: When wing part is crumpled, you can just replace wing part only.

Point 3: It is easy to detach head part and wing part because of screw type.

Connection state

Just fix screw of wing part to the threaded screw hole of head part.

Patent pending

DARTS

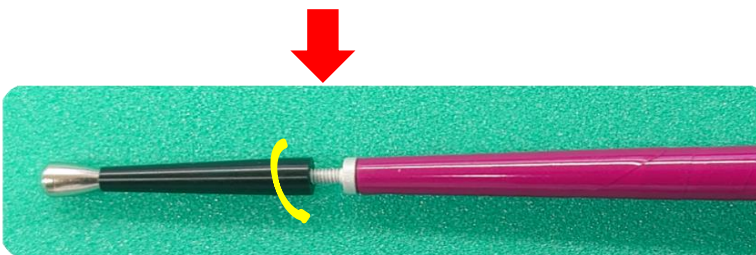

Products Code. SWFA-00200001

◎ How to assemble "Custom-made Darts"?

① Please prepare Head part and Wing part.

② Push screw of wing part round to fix at screw threaded hole of head part.

Please be careful not to insert head part obliquely as this photo shows, because center of both parts may not match.

③ Please tighten a screw until it does not turn.

If the screw is loose, darts may be damaged, or only the head part remains in the target when darts get stuck. Please be careful.

Remarks:

- * Only L type is available for Custom-made Dart. Please adjust diameter of dart by yourself before using.
We suggest you to use Fukiya Gauge & Cutter Set for adjusting the diameter.
- * Length of dart becomes 20cm when you adjust diameter of dart as 12.90mm (not including tear drop head pin).
- * There may be the allowable margin of error in manufacturing because of hand processing.
- * Please assemble head part and wing part by yourself.
- * Please be careful not to lose head part when assembling because it is small.
- * Please never use wing part only without assembling head part. It is very dangerous.

DARTS

Products Code SWFA-00200001

"Custom-made Dart" is separated into "Head part" and "Wing part". You can use this "Custom-made Dart" by combining these two parts.

As only the either part cannot be used as a "Custom-made Dart", please be careful when you purchase this Custom-made Darts.

	Products No.	Unit Price
10 Pack - Head Part = Teardrop 3mm	1400	¥1,320
Lighter head pin compared with "Rocket Pin"		
Recommendable for players who have rather weaker abdominal breathing		
Length: 2.0cm (length of head pin: 3mm)		

10 Pack - Head Part = Teardrop 5mm	1401	¥1,320
Center of gravity is located near to head pin compared with "Rocket Pin Dart" and there is a tendency that the focusing property becomes higher.		
Recommendable for players who get firm abdominal breathing.		
Length: 2.2cm (length of head pin: 5mm)		

- * As head parts are consumables, screw thread may be crushed by continuous removing and may be deteriorated and damaged by continuous use.
- * Color of Head Part is BLACK only.

10 Pack - Wing Part = L type			
Wine Red	L type	1510	¥2,640
Black	L type	1512	¥2,640

Length: 19cm (before adjusting length)
Handling manual is attached.

- * There is no stopper inside dart.
- * Only L type is available. Please be careful that we do not have Cut type.
- * There may be the allowable margin of error in manufacturing because of hand processing.
- * As wing parts are consumables, they may be deteriorated and damaged by continuous use.

Please read next page about Wing Part Metalic Color.

DARTS

Products Code SWFA-00200001

"Custom-made Dart" is separated into "Head part" and "Wing part". You can use this "Custom-made Dart" by combining these two parts.

Wing Part = L Type, having beautiful colors like Metal. Please select your favourite color.
Please use together with Head Part.

		Products No.	Unit Price
10 Pack - Wing Part = L type			
Metalic Green	L type	1523	¥2,940
Metalic Pink	L type	1524	¥2,940
Metalic Blue	L type	1525	¥2,940

Length: 19cm (before adjusting length)
Handling manual is attached.

- * There is no stopper inside dart.
- * Only L type is available. Please be careful that we do not have Cut type.
- * There may be the allowable margin of error in manufacturing because of hand processing.
- * As wing parts are consumables, they may be deteriorated and damaged by continuous use.

Please read next page about the details of "Custom-made Darts".

Darts Products Code. SWFA-00200001
with "Rocket Pin" (special shape of head pin)

		Products No.	Unit Price
10 Pack - Cut type (12.90mm)			
10 Pack - L type			
Wine Red	Cut type	1100	¥2,800
Wine Red	L type	1110	¥2,800
Navy	Cut type	1101	¥2,800
Navy	L type	1111	¥2,800
Black	Cut type	1102	¥2,800
Black	L type	1112	¥2,800
Green	Cut type	1103	¥2,800
Green	L type	1113	¥2,800
Length: 20cm		Handling manual is attached.	

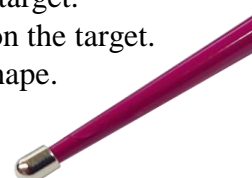

- * Beginners may be recommended to select Cut type (12.90mm), which can be used as it is.
Persons with intermediate and advanced skill may select L type, which can be adjusted the length based on the strength of player's abdominal breathing.
- * There is no stopper inside dart.

- * There may be the allowable margin of error in manufacturing because of hand processing.
- * As darts are consumables, they may be deteriorated and damaged by continuous use.

Remarkable features of our Rocket Pin Darts:

- 1 New Shape of head pin (we call "Rocket Pin"):
Tip of head pin now changes to "Round shape", which is easy to stick into target.
New Shape of head pin may not crush the darts which were already stuck on the target.
New darts may not bounce off when hitting the target because of its new shape.
- 2 We improved the way of paintings, which results better durability.
- 3 We use a small tube inside Dart, which fix head pin in the center of Dart.
(Patent pending)

Tip part of Rocket Pin Dart

* Images of a cross section

Without inside fixing tube

Head pin is not placed in the center of dart.

With inside fixing tube

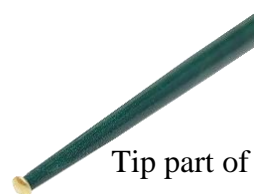

Head pin is placed in the center of dart.

This may minimize the tremble during flying.

Darts Products Code. SWFA-00200001
with "Nail Pin" (new shape of head pin)

Recommendable for players who feel heavy for Customs-made Darts and Rocket Pin Darts and prefer lighter darts to heavier darts.

- * Only Cut type is available.
 - * Darts are cut approximately 12.90mm diameter.
 - * Inside fixing tube is not installed for these Nail Pin Darts.
- Length: 20cm

Tip part of Nail Pin Dart

Darts

Products Code. SWFA-00200001

	Products No.	Unit Price
Stopper (100-Pack)	5270	¥220

Small parts avoiding overlapped dart does not bite deeply into the base dart.
This products may help not damaging darts.

We deliver in the shape of sheet.

Example: Rocket Pin Dart

Please use a stick with round shaped head (not too sharp) to push this stopper into a dart.
Please push at the position of 6 to 7cm from the haed of dart. (In case Wing Part only,
at the position of 4-5cm.)
If you push too deep, it may not be effective.

Length: 8mm (one sheet has 100 pieces of stopper)
Handling manual is atached.

* Only one stopper can be inserted into a dart.

Pipes

Products Code. SWFA-00200002

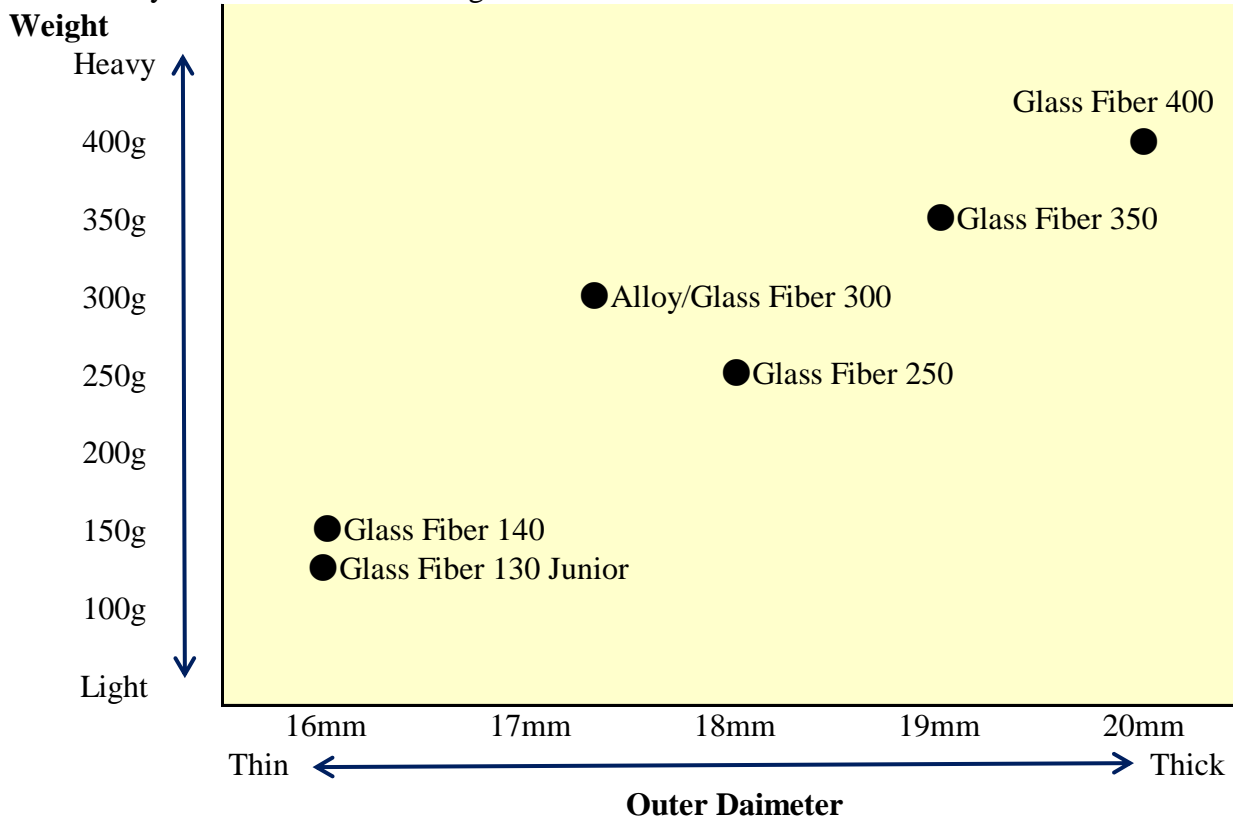

We have several types of Glass Fiber Pipes with the weight from 130 grams (for Junior player) to 400 grams.

We can also offer two-layer structure blow pipe, such as Aluminum Alloy(inside)/Glass Fiber (outside).

You can select the most suitable blow pipe for you considering each characteristics (weight and outer diameter).

Here is the chart of characteristic of each Blow Pipe for your selection.

◎ To select by outer diameter and weight

You may expect to minimize the tremble of pipe when you blow by using a heavier pipe, but a heavier pipe may be hard to handle because of its weight. Heavier pipe may be recommendable for the players who have acquired stable basic motions.

A lighter pipe is recommendable for the beginners because it is easy to handle.

Aluminum alloy/Glass fiber pipe has a intermediate weight, but its thinner outer diameter is a feature of this pipe. Some player prefer thinner outer diameter blow pipe.

* These are based on our investigation and higher scores can not be guaranteed.

◎ Difference between a single piece pipe and a joint pipe:

A single piece pipe can be used as it is, but cannot be divided.

A joint pipe can be divided into three parts, which is convenient for you to carry. We put small marks on pipe where the level difference of joint part becomes minimum.

Pipes

Products Code. SWFA-00200002

Handling manual is attached.

- * Four inside dart stoppers keep a dart so that a dart is hard to fall down even if a blow pipe slants.
- * In order to keep personal hygiene, we recommend players to change mouthpiece periodically.
- * Please use darts with 12.80mm through 12.95mm diameter. Dart stoppers may not work effectively if diameter of dart is outside above sizes.

Silicon Mouthpiece (External)

Clear (transparent) color

4010

¥240

Pink color

4011

¥240

Outer diameter: 22mm, Length: 5cm

Handling manual is attached,

To be used over the mouthpiece (internal), this silicon made soft mouthpiece may be recommendable for the players who tend to bite the mouthpiece.

Disposable Mouthpiece - 30 Pack

4020

¥2,740

Length: 4cm

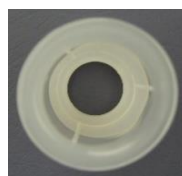

Handling manual is attached.

To be used over the mouthpiece, strongly recommendable for the expemential session of Sport Wellness Fukiya where several players co-use one blow pipe.

It is easy to remove because of inside protuberances.

- * This product must be disposed after use.
- * Can not be used over the Silicon Mouthpiece (External).
- * Can not be used for the official meet and competition and Dan-I/Kyu-I grading test.

Inside protuberance

* Pipe shown in the photo is not included.

Metal Plate to pull out overlapped dart

5260

¥500

When two or more darts overlapped, it may be easier to pull out dart by using this plate.

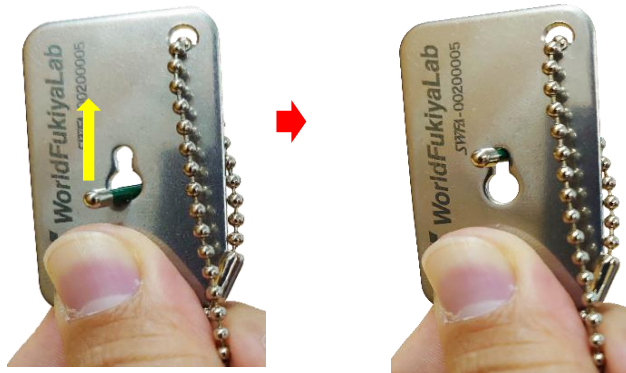

Size: Length 30mm x Breadth 50mm x Thickness 2mm (approximately) with a hole for chain.

Due to the requests from users,
we make a hole so that user can fix
keyholder etc.

◎ How to use

- ① To put Yanuki into overlapped darts, then put these overlapped darts with Yanuki into a larger hole of this metal plate and slide head pin to smaller hole.

- ② After sliding head pin to a smaller hole, keep a plate and darts perpendicularly and pull out.
- When pulling out a dart, you should have an overlapped dart (wine red in the picture).
Be careful that you cannot pull out a dart if you have the first dart (green in the picture).

- * When you try to pull out Custom-made Dart, please do not turn the a dart because a head part of Custom-made dart may work loose and come off.
- * There may be a possibility that a dart becomes destroyed if you use too much power.
- * We cannot guarantee that all the overlapped darts can be pull out by using this metal plate.
